PROFESSIONAL SUMMARY

Full-stack Software Engineer with experience building and deploying production systems using ASP.NET Core, React, TypeScript, and MySQL, backed by more than five years diagnosing AWS infrastructure in mission-critical environments. Designed modular architectures with DDD, secure authentication, and deployments on Railway for both personal and client projects. Currently pursuing a Bachelor's degree in Systems Engineering with an emphasis on Software Development (expected Mar. 2027), seeking a role that combines software development with cloud expertise.

WORK EXPERIENCE

Amazon Support Services CR, San José, CR

Jan. 2023 – Mar. 2026

AWS Technical Support Specialist

- Served as an escalation point for high-severity incidents, coordinating with internal AWS engineering teams to drive resolution of critical production issues.
- Diagnosed and resolved complex cloud infrastructure issues across core AWS services including EC2, S3, EBS, RDS, DynamoDB, VPC, and Route 53.
- Analyzed CloudWatch logs, system logs, and configurations to identify root causes of outages, performance degradation, and connectivity failures reported by customers.
- Reproduced issues in isolated test environments to validate fixes and prevent recurrence in customer workloads.
- Communicated technical findings and step-by-step remediation guidance to stakeholders via tickets, chat, and calls, translating complex cloud concepts into clear, actionable language.

Amazon Support Services CR, Remote, CR

Jul. 2020 – Dec. 2022

Advanced Technician, D2AS

- Acted as a subject matter expert among peers, providing real-time technical guidance to Tier 1 and Tier 2 associates handling Amazon Echo and Alexa device cases.
- Supported associates in diagnosing and resolving complex hardware, software, and connectivity issues beyond their level's resolution scope.
- Served as a knowledge resource on escalation procedures, device behavior, and Amazon tools, helping associates navigate ambiguous or highly complex tickets.
- Acted as the primary liaison between the Hardware and Software departments, facilitating cross-functional communication to ensure accurate diagnostics and faster issue resolution.

EDUCATION

Universidad Latina de Costa Rica, San José, CR

2024 – present (expected Mar. 2027)

Bachelor's Degree in Systems Engineering, emphasis in Software Development

Relevant coursework: Software Conceptual Design, Computer Architecture, Operating Systems, Databases II, Requirements Engineering, Computer Networks.

FEATURED PROJECTS

CDM, Clinical Management System (consultoriosdrmoraga.com)

- Single-tenant clinical management system built for Consultorios Dr. Roy Moraga; modular monolith in .NET 8 with Domain-Driven Design (DDD) across 16+ modules.
- Built with EF Core, MySQL, and React 18 / TypeScript using Feature-Sliced Design; deployed on Railway.
- Implemented configurable per-room scheduling, clinical history, audit logging compliant with Costa Rica's Law 8968 (data protection), PDF report generation, and an AI-powered WhatsApp agent (Twilio, Anthropic SDK, Redis, SignalR) for appointment handling.

TECHNICAL SKILLS

Languages: C#, Java, JavaScript, TypeScript, Python, SQL

Frameworks & Libraries: ASP.NET Core, React, Next.js, Node.js, Entity Framework Core

Databases: MySQL, SQL Server, PostgreSQL

Cloud & DevOps: AWS (EC2, S3, EBS, RDS, DynamoDB, VPC, Route 53, CloudWatch), Railway, Heroku, Docker, Git, GitHub Actions, CI/CD

Tools: Visual Studio 2022, VS Code, IntelliJ IDEA, Figma, Claude Code

Spoken Languages: Spanish (native), English (advanced, C1)

CERTIFICATIONS & COURSES

- AWS Certified Solutions Architect, Associate
- Power Automate, Business Process Automation with SharePoint and Teams (2026)
- Cambridge C1 Advanced (CAE), Cambridge Assessment English (2018)
